DETAILED ACTION

The submission establishing the ownership interest of the assignee is informal. There is no indication of record that the party who signed the submission establishing the ownership interest is authorized to sign the submission (37 CFR 3.73(b)).

The consent and assignment of Advanced Respiratory, Inc. is not the current Assignee.

The reissue oath/declaration filed with this application is defective (see 37 CFR 1.175 and MPEP § 1414) because of the following:

There is no residence and mailing address provided.

There is no statement indicating that the person signing has reviewed and understands the contents of the specification and claims.

In the second paragraph of the Oath filed 6/6/6 it is stated that "We claimed less" than we had a right to. In the next line it states "We failed to claim less" then we had a right to. This appears contradictory. Proper language appears in the MPEP 1414 (I). "Applicant believes the original patent to be partly inoperative or invalid by reason of the patentee claiming less than patentee had a right to claim in the patent."

The reissue oath/declaration filed with this application is defective because the error which is relied upon to support the reissue application does not **clearly identify** a single word, phrase, or expression in an original claim and **how** it renders the original patent wholly or partly inoperative or invalid.
